Brisbane, Australia.

EDUCATION

Torrens University Australia | *Brisbane QLD*

April 2026

Master of Business Information Systems | Expected April 2026

- **Relevant Coursework:** Database Management Systems, Network Security & Configurations, Systems Analysis, and Business Process Modeling.

Michael Okpara University | *Nigeria*

Bachelor of Engineering (B.Eng.) in Computer Engineering | 2021

- **Key Focus:** Software Engineering, Embedded Systems, and Data Structures.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, HTML, CSS
- Frameworks: React.js, Next.js, Express.js, Redux, React Query, Apollo Client, Tailwind CSS
- Backend & APIs: REST APIs, GraphQL, WebSockets, tRPC, OAuth
- Databases: PostgreSQL, MySQL, MongoDB, Redis
- AI / Data Tools: Pandas, NumPy, Matplotlib, LangChain
- DevOps & Tools: Docker, GitHub Actions (CI/CD), Linux, Nginx
- Testing: Jest, Mocha, React Testing Library
- Other: Prisma ORM, Stripe API, Git
- Core Strengths: Debugging, root-cause analysis, performance optimization, algorithmic problem solving

AI & MODEL EVALUATION EXPERIENCE

- Evaluated code outputs for correctness, efficiency, and adherence to requirements
- Performed comparative analysis of multiple algorithmic solutions, selecting optimal implementations based on time and space complexity
- Assessed edge cases, logical consistency, and potential security vulnerabilities in code
- Applied structured debugging techniques to identify and resolve defects in complex systems

WORK EXPERIENCE

Web Developer (Contract), DARSI Foundation, Lagos.

Sept - Dec 2023

- Developed responsive, accessible web applications from Figma designs using HTML, CSS, and JavaScript
- Implemented semantic web standards (ARIA, Open Graph, HTML5) to improve accessibility and SEO
- Conducted technical code reviews and post-production audits, identifying performance bottlenecks and improving system efficiency by 50%
- Performed structured debugging and testing to ensure reliability and maintainability of deployed systems.

PROJECTS

Dionysus — AI Developer Collaboration Platform

Oct. 2024

- AI-powered developer collaboration platform with GitHub integration
- Built using Next.js, React, PostgreSQL, Prisma, TypeScript, and Tailwind
- Designed and implemented a Retrieval-Augmented Generation (RAG) pipeline using LangChain and Gemini AI for context-aware code search and generation
- Integrated Stripe for credit-based usage system tied to repository activity
- Utilized tRPC for end-to-end type-safe API communication
- Evaluated AI-generated responses for relevance, accuracy, and contextual alignment within repository-level queries.

Currate — Process Automation SaaS

June 2025

- Built a process automation platform integrating Slack, Notion, Discord, and Google Drive via OAuth
- Developed Discord bots to automate interactions within communities using the Discord API
- Built with TypeScript, React, Next.js, REST APIs, and Tailwind
- Focused on scalable architecture and real-time system integrations.
