Brisbane, Australia.

EDUCATION

Torrens University Australia | *Brisbane QLD*

April 2026

Master of Business Information Systems | Expected April 2026

- **Relevant Coursework:** Database Management Systems, Network Security & Configurations, Systems Analysis, and Business Process Modeling.

Michael Okpara University | *Nigeria*

Bachelor of Engineering (B.Eng.) in Computer Engineering | 2021

- **Key Focus:** Software Engineering, Embedded Systems, and Data Structures.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, HTML, CSS
- Frameworks: React.js, Next.js, Express.js, Redux, React Query, Apollo Client, Tailwind CSS
- Backend & APIs: REST APIs, GraphQL, WebSockets, tRPC, OAuth
- Databases: PostgreSQL, MySQL, MongoDB, Redis
- DevOps & Tools: Docker, GitHub Actions (CI/CD), Linux, Nginx
- Testing: Jest, Mocha, React Testing Library
- Other: Prisma ORM, Stripe API, Git

WORK EXPERIENCE

Web Developer (Contract), DARSI Foundation, Lagos.

Sept - Dec 2023

- Worked with a designer and the organization's project manager to design and develop a functional, user-friendly website.
- Utilized HTML, CSS, JavaScript (jQuery), to convert Figma design to pixel perfect, responsive web pages.
- Included semantic web technologies (ARIA, HTML5, Open Graph) to enable accessibility and improve search engine optimization (SEO).
- Centralized project workflow by organizing team meetings via email and managing version control and collaboration on GitHub.

- Ran post-production quality assurance tests consequently improving performance by 50%.

PROJECTS

Dionysus — AI Developer Collaboration Platform

Oct. 2024

- An AI enabled developer collaboration platform with Github Integration.
- Built entirely on Nodejs using Nextjs, React, Postgresql, Prisma, Typescript, and Tailwind.
- Used Langchain, Gemini AI and the Github API to build a bespoke Retrieval Augmented Development (RAG) Pipeline that facilitates content aware search in the codebase.
- Integrated Stripe to implement a credit-based payment system that charges credits per file on Github repository.
- Utilized tRPC for seamless end-to-end integration.

Currate — Process Automation SaaS

June 2025

- A process automation SAAS for creators, developers and solopreneurs.
- Used OAuth to integrate 4+ collaborative platforms including Slack, Notion, Discord, and Google Drive centralizing content creation and control
- Created Discord Bots to manage and participate in rooms and spaces using the Discord API
- Built on Bun using Typescript, React, Nextjs, Tailwind, Ngrok, REST API.
